PROFESSIONAL SUMMARY

AI-Native CloudOps Technical Lead with ~9 years of experience designing, deploying, and operating scalable cloud infrastructure on Azure and AWS, specializing in cloud operations, FinOps, Site Reliability Engineering (SRE), automation, and AI-driven DevOps practices. Proven expertise in cloud cost governance (delivering ~\$170K/month in savings), CI/CD automation, infrastructure-as-code (ARM), and multi-tenant SaaS platform operations. Currently leading a team of 10 engineers at Eptura (formerly Condeco), driving operational excellence through AI-assisted tooling (Claude Code, GitHub Copilot, ChatGPT, Warp AI), PowerShell automation, Azure DevOps, and cloud-native services (App Services, Function Apps, ADF, Cosmos DB, SQL DB, APIM, Logic Apps, Runbooks etc.). Holds 5 Microsoft & AWS certifications; recognized with multiple awards for innovation, team leadership, and delivery excellence.

KEY ACHIEVEMENTS

- Delivered ~\$170K/month (~\$2M annually) cloud cost savings through FinOps strategies including rightsizing, reserved instances, and workload optimization
- Improved Mean Time to Resolution (MTTR) by ~40% by implementing AI-driven automation, proactive monitoring, and structured runbooks
- Automated cloud operations using PowerShell and Azure Automation, reducing manual effort by 30-40%
- Led CloudOps for multi-tenant SaaS platform (2000+ resources) ensuring high availability and scalability
- Recognized with Spot Award and Leadership Award for automation and cross-team impact
- Achieved multiple awards including Employee of the Month (2x) and Kaizen Award for process improvements

CORE COMPETENCIES

- **Cloud Platforms:** Microsoft Azure, AWS
- **Cloud Services:** Azure PaaS/IaaS (App Services, Function Apps, VMs, AKS, APIM, Cosmos DB, Azure SQL, Azure Data Factory, Synapse, Storage, Key Vault, Logic Apps, Azure AD/B2C, Service Bus, Event Grid, ARM Templates), AWS (EC2, S3, Lambda, CloudWatch, DocumentDB)
- **Monitoring & Observability:** Azure Monitor, Application Insights, Log Analytics, KQL, Azure Workbooks/Dashboards, AWS CloudWatch, Power BI
- **DevOps & Automation:** Azure DevOps (Pipelines, Repos, YAML), CI/CD, Azure Automation Runbooks, PowerShell, ARM Templates, Azure CLI, GitHub, Infrastructure-as-Code (IaC)
- **AI & Productivity Tools:** Claude Code (Anthropic), GitHub Copilot, ChatGPT / GPT-4 (OpenAI), Microsoft Copilot, Warp AI Terminal - used for AI-assisted scripting, code generation, automation acceleration, and DevOps workflow optimization
- **Databases & Data Engineering:** Azure SQL Database, Cosmos DB, Azure Table Storage, Azure Data Factory, Synapse Analytics, Databricks, DocumentDB, Azure Data Lake
- **Programming & Scripting:** PowerShell, Azure CLI, SQL, KQL, C#, JSON, YAML
- **Security & Identity:** Azure AD, RBAC, MFA, Key Vault, Managed Identity, Azure Defender, Prisma Cloud, IAM
- **ITSM / ITIL:** Incident, Problem, Change & SLA Management | ServiceNow, JIRA | ITIL Foundation Certified

- **Tools & Platforms:** Visual Studio, VS Code, SSMS, Postman, Confluence, PowerShell ISE, MS Office 365, Warp Terminal, mRemoteNG

PROFESSIONAL EXPERIENCE

Eptura (Formerly known as Condeco Software)

Jan'24 – Present

Technical Lead – CloudOps

- **Cloud Cost Governance:** Designed and implemented Azure cost optimization strategies, achieving ~\$170K/month (~\$2M/year) in savings through right-sizing, reserved instances, auto-scaling, and resource lifecycle management.
- **AI-Driven DevOps:** Integrated AI tools (Claude Code, GitHub Copilot, ChatGPT, Warp AI) into engineering workflows to accelerate PowerShell scripting, YAML pipeline authoring, and cloud automation — reducing development effort by ~30%.
- **Team Leadership:** Led and mentored a cross-functional CloudOps team of 10 engineers, establishing operational standards, runbook governance, and knowledge-sharing practices across Agile sprints.
- **CI/CD & Automation:** Built and maintained Azure DevOps pipelines (YAML) and Azure Automation Runbooks to automate provisioning, deployments, and recurring operational tasks across 2000+ cloud resources.
- **Cloud Monitoring & Observability:** Architected enterprise monitoring using Azure Monitor, Application Insights, Log Analytics (KQL), and Power BI dashboards for real-time SLA reporting and anomaly detection.
- **Multi-Tenant SaaS Platform Operations:** Managed enterprise SaaS infra on Azure (App Services, Function Apps, APIM, Cosmos DB, Azure SQL, ADF, Logic Apps, Service Bus, Event Grid) serving global enterprise customers.
- **Incident & Escalation Management:** Led P1/P2 critical incident resolution, reducing MTTR by ~40% through structured runbooks, automated alerting, and post-incident root cause analysis (RCA).
- **Security & Compliance:** Implemented Azure security best practices including RBAC, Key Vault, Managed Identity, Azure Defender, Prisma Cloud, and zero-trust network policies.
- **JIRA & Agile Operations:** Configured and maintained JIRA for sprint planning, workflow automation, and agile delivery tracking.
- **Reporting & Visualization:** Developed Power BI and Azure Workbook dashboards for executive-level reporting covering availability, infrastructure Monitoring, cost trends, and ROI of automations.

LTIMindtree | A Larsen & Toubro Group Company | Cloud & Infra Services – Healthcare

Feb'22 – Dec'23

Specialist – Cloud Engineering

Clients: Abbott Laboratories & Zoll Data Systems

- **Azure Infrastructure Management:** Provisioned and managed Azure resources (App Services, Function Apps, AKS, APIM, Cosmos DB, SQL DB, ADF, Databricks, Synapse Analytics, Storage Accounts, Key Vault, Logic Apps) for global healthcare clients.
- **Cost Optimization:** Identified and implemented infrastructure optimization recommendations, delivering ~\$13K/month in client cost savings.
- **CI/CD Pipeline Development:** Designed and maintained Azure DevOps pipelines (YAML, Azure CLI) to automate deployment workflows and reduce manual release cycles.
- **Monitoring & Alerting:** Configured Azure Monitor, Application Insights, and Log Analytics with custom KQL queries and Azure Workbooks for proactive issue detection and compliance reporting.
- **Security & Identity:** Enforced Azure AD, RBAC, Key Vault, and Azure Defender policies; remediated cloud security vulnerabilities.
- **ITSM / ITIL:** Managed incidents, service requests, changes, and problems in ServiceNow and JIRA under ITIL frameworks.

- **Awards & Recognition:** SpotON-HatsOff Award for cross-functional automation delivery; Leadership-Gracias Award for team excellence; Customer Appreciation for **\$13K/month** cost savings.

Tata Consultancy Services (TCS) | *Energy & Resources* | *Downer Group*

Oct'18 – Jan'22

Support Engineer – Azure Cloud

- **Infrastructure Deployment:** Deployed and managed Azure IaaS/PaaS resources (VMs, Cosmos DB, SQL DB, ADF, Logic Apps, Storage Accounts) across production and non-production environments.
- **Identity & Access Management:** Configured Azure AD, MFA, RBAC roles, and managed user/group access to Azure resources.
- **Automation & IaC:** Developed ARM templates and PowerShell scripts to automate resource provisioning and configuration management.
- **Monitoring & Governance:** Established monitoring, alerting, and logging mechanisms; ensured SLA compliance for P1/P2 incidents via ServiceNow.
- **Cost Management:** Monitored Azure resource utilization and implemented cost-saving recommendations to maintain budget efficiency.
- **Awards & Recognition:** TCS Kaizen Award for 7 process improvement ideas; 2× Employee of the Month; Best Onshore Support Award; Best Quality Award.

Tata Consultancy Services (TCS) | *BFSI* | *ABN AMRO Bank*

Aug'17 – Oct'18

Process Analyst

- **Process Automation:** Identified, analyzed, and automated a critical manual process — designed process maps, collaborated with IT, and executed UAT, achieving 18% headcount reduction and 20% throughput increase.
- **Process Improvement:** Conducted QC Grid analysis and capacity utilization planning; delivered weekly/monthly shrinkage reports to management.
- **Award:** Star Performer of the Month – TCS BFSI vertical, India.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: Azure Security, Compliance & Identity Fundamentals (SC-900)
- AWS Certified Cloud Practitioner (CLF-C01)
- ITIL® Foundation Certificate in IT Service Management

EDUCATION

MCA (Master of Computer Applications), D.A.V. Institute of Management, Faridabad, Haryana	2020		74.10%
B.Sc. (Electronics), Delhi University, New Delhi	2017		68.98%
Class XII, Haryana Board of School Education, Rohtak	2013		86.00%
Class X, Board of High School & Intermediate Education, UP	2011		67.00%

ADDITIONAL INFORMATION

- **Languages:** English (Professional), Hindi (Native), Punjabi (Intermediate)
- **Soft Skills:** Team Leadership, Problem-Solving, Analytical Thinking, Stakeholder Communication, Adaptability
- **Interests:** Cricket, Sci-Fi & Superhero Movies, Hindi Retro Music
